Registration Form:

- User registration form with fields for:
- Name
- Email
- Password
- Phone

Client Page:

- Display available cars for rent.
- Filter cars by location and type.
- Two sections for clients:
- Rent a Car: Select cars for rent.
- List Your Car: Provide details to list your car for rent.

Car Listing:

- Include fields for users to input details about their car for rent.
- Type of car
- Proof of availability
- Current condition
- Location
- Availability schedule

Renting a Car:

- Select cars for rent.
- Provide driver's license details (if renting without a driver).
- Input desired pickup time.
- Allow for additional comments or special requests.

Admin Page:

-New Car Approval Section:

- Review and approve new car listings.

-User Information Editing:

- Manage and update user information.

This approach integrates the car listing process directly into the client's experience, making it more user-friendly. Users can seamlessly switch between renting a car and listing their car for rent on the same platform. If you have any specific design or functionality preferences, you can customize these requirements accordingly.
